

Please complete the checklist before attending in-person training. This prerequisite training should take approximately 2 hours.

Training Pre-Work Checklist
Tools Available On Website

<https://www.yielddefender.com/support---contact.html>

1. YDD DOM V2.1 Drone Operator Manual
2. Mission Planner Software
 - a. Note: The Latest Approved Version of Mission Planner Yield Defender is available on the through our website. Do NOT accept the prompt to update Mission Planner when asked upon opening the software.
3. Pre-flight Checklist V1.0
4. Flight Log Book
5. FAA Part 107 Summary
6. ROI Tool

Pre-Visit Training

7. Watch our Yield Defender Videos (courtesy of Landmark Implement).
<http://www.landmarkimp.com/support-videos/drones>
 - a. Note: the videos were created using the Yield Defender "Eagle" which is no longer in production, however the operation is the same for the HE.
8. Download the software to your computer
9. Utilize the videos and make a MINIMUM of 8 different missions and save them to your computer for review, during in-person training.
 - a. These missions can be in any field you want, just make sure you do it so that you have a basic general understanding of how Mission planner works
 - b. Keep in mind aircraft limitations. i.e. wind and battery power. Theoretical aircraft design and practical performance vary due to environmental conditions. Plan for safety and success. You can fly approximately 80 acres with a 15 % overlap on a healthy battery.
